Over 22,000 people are employed in NSW in forestry and associated manufacturing – the majority in Regional NSW. The \$2.8 billion NSW forestry and wood product manufacturing industry is a significant economic driver for regional NSW, with a softwood plantation sector industry (pre-fires) value of around \$2.24 billion and native forestry sector industry value of \$560 million.

On the South West slopes around 40 per cent of softwood plantations have been lost in the fires; While on the North Coast around 50 per cent of private and public hardwood forests have been burnt.

The impacts of the fires will have a significant affect not only on timber growers but also on downstream parts of the industry such as manufacturing.

This package will provide financial assistance to forestry businesses that have been impacted by the bushfires from 31 August 2019 to assist with haulage of burnt timber from out of area forests.

The eligible activities and costs have been determined through the development of the Forestry Recovery Plan available on the Bushfire Industry Recovery Package website.

Project Costs

* indicates a required field

Eligible Amounts and Limits

Haulage of burnt timber (unprocessed)

Contributions are available up to \$0.10 per tonne for every kilometre hauled which exceeds 100 kilometres from the harvest site to processing facilities located in NSW, up to a maximum contribution of \$30/tonne.

Haulage costs are limited to travel within NSW only.

An applicant contribution is not required in respect of these additional haulage costs, noting that applicants will fund the cost of haulage up to 100 kilometres.

Up to \$20 million is available to support the haulage of burnt timber. This includes \$10 million from the NSW Government and \$10 million from the Commonwealth Government.

Should my grant request include GST?

- For eligible organisations registered for GST and where it is payable, we will pay the approved grant amount plus 10 per cent.
- If eligible organisations are not registered for GST, they will need to incorporate any GST paid by them to third parties into the project budgets and the grant amount.

Kilometre/Haulage calculations

Calculations are based on the tonnes of burnt timber hauled in the claim period, e.g.: total eligible kms from harvest site to processing site over a period of time x total tonnes hauled x rate.

The calculation below is a guide on the maximum grant you may be eligible for. If you are claiming trips of different lengths, the total grant you may be eligible for may be less than the maximum provided below.

Is the total distance between harvest site or NSW border (for harvest sites not in NSW) to the processing site in NSW greater than 400km? *

- Yes - haulage will be over 400km
 No - haulage is under 400km

Haulage under 400km

Total kilometres travelled from the harvest site or NSW border (for harvest sites not in NSW) to a processing site in NSW *
